Jan 2016 – Present (6y 10m)

PHP CSS HTML JavaScript Invision Photoshop Bootstrap MySQL

- Serve customers as a vital conduit for the creation of custom experiences through a methodology of communicative requirements gathering, innovating, and performing bespoke front-end development (HTML, CSS, JavaScript, jQuery, Angular, and integration of other front-end frameworks) and adjustments to PHP, JavaScript, SQL, JSON, APIs, and MySQL in the background.
- Enhance web presence accessibility and SEO by 70%–80% through implementation of structured data markup, guiding page structure and layout, ADA/WCAG auditing, and planning edits to Google business listings.
- Slash digital editing costs by 80% on average by performing in-house edits to assets using Premiere Pro and Photoshop.
- Reduce hours of client confusion and work entropy through consults on website setup, including content management systems (WordPress), hosting, domain, and SSL certificates.

Analyst, HILO MEDICAL CENTER

Sep 2017 – Aug 2020 (2y 11m)

PHP CSS HTML JavaScript Photoshop Salesforce Wordpress MySQL

- Championed the acquisition of vanguard solutions to enhance site usability, ADA/WCAG compliance, search engine optimization, and a single source of truth in company data across hundreds of web applications and browser platforms.
- Enhanced patient wayfinding experience and decreased capital costs by 80% in the development of a lobby touch-signage interface by coding HTML, HTML5, CSS, CSS3, and JavaScript on ethernet-powered (PoE) remote network devices.
- Spearheaded the replacement of a legacy SharePoint intranet, elevating productivity, culture awareness, and inter-departmental data dissemination for hundreds of employees by guiding cross-functional teams to source, unit testing, and implement a leading-edge SaaS framework based on Salesforce; conducting user research and extrapolating core findings to inform the adoption processes.
- Bolstered employee engagement with competence and compliance training and impacted quality of care for thousands of patients annually as a part of a core team developing and assembling digital multimedia into learning management system curricula, introducing novel design and visual asset utilities, championing and incorporating closed captioning, streamlining directory structures, le optimization, and troubleshooting issues.

CSS

HTML

Tableau

Android

Excel

Bootstrap

Premiere Pro

- Strengthened client relationships, interpreting continuously evolving core business KPIs with a growth mindset, innovating and iterating based on emerging requirements, and advocating client needs and goals to management and development teams to drive focused solutions for thousands of users.
- Amplified product value as the primary point of contact in issue resolution for thousands of users worldwide and intermediary for the development team, leveraging emotional intelligence and creative thinking to derive novel solutions.
- Reduced costs by 80% through sourcing Meraki (Cisco) device management to replace AirWatch as the primary compliance vendor in remote monitoring and management of a 40+ device Android fleet.
- Coded and deployed Visual Basic to automate processes and produce innovative interim solutions for complex reporting needs, over hundreds of thousands of rows of mission-critical data as the dev team built out features to permanently bridge gaps.

Education

MICA

Mar 2020 – Aug 2021 (1y 5m)

Graduate Degree (3.7) UX Design

Georgia State University

Aug 2006 – Jan 2008 (1y 5m)

Undergraduate Degree (3.1) Computer Information Systems
